1. Test Scope & Objectives

Objective

To verify that the DemoBlaze e-commerce web page renders correctly, maintains consistent layout, works without broken links, and delivers uniform functionality across different browsers and devices.

Pages in Scope

- Home Page (Product Listing)
- Product Detail Page
- Cart Page
- Sign Up Modal
- Login Modal
- Contact Modal
- About Us / Carousel Section
- Navigation Bar

Features in Scope

- Navigation menu and links
- Product category filtering (Phones, Laptops, Monitors)
- Product cards display and images
- Carousel/slider
- Sign Up and Login modals
- Add to Cart functionality
- Cart page — item listing, delete, place order
- Contact form
- Footer links

Out of Scope

- Backend/API performance testing
 - Payment gateway live transactions
 - Accessibility testing (WCAG)
-

2. Test Environment Matrix

Browsers Tested

Browser	Version	OS
Google Chrome	Latest	Windows 11
Mozilla Firefox	Latest	Windows 11
Microsoft Edge	Latest	Windows 11
Safari	Latest	macOS / iOS

Devices Tested

Device Type	Screen Size	Example Device
Desktop	1920×1080 px	Windows PC / MacBook
Tablet	768×1024 px	iPad / Android Tablet
Mobile	375×812 px	iPhone 13 / Samsung S21

3. Pages & Features Tested

#	Page / Feature	Description
1	Home Page	Hero carousel, product grid, category filters

#	Page / Feature	Description
2	Product Detail Page	Image, name, price, description, Add to Cart btn
3	Cart Page	Item list, price, delete button, Place Order btn
4	Sign Up Modal	Username & password fields, Close & Sign Up btns
5	Login Modal	Username & password fields, Log In & Close btns
6	Contact Modal	Email, Name, Message fields, Send message btn
7	Navigation Bar	Logo, Home, Cart, Log In, Sign Up links
8	Category Filters	Phones, Laptops, Monitors filter buttons
9	Footer	Links and branding at page bottom

4. Browser Compatibility Test Cases

TC-BC-001 — Home Page Loads on Chrome

Field	Details
Test Case ID	TC-BC-001
Description	Verify home page loads fully on Google Chrome
Browser	Google Chrome (Latest)
Preconditions	Browser is open, internet is connected
Test Steps	1. Open Chrome 2. Navigate to https://www.demoblaze.com
Expected Result	Home page loads with navbar, carousel, and product grid
Actual Result	Page loads correctly. All products display with images and prices
Status	PASS

TC-BC-002 — Home Page Loads on Firefox

Field	Details
Test Case ID	TC-BC-002

Field	Details
Description	Verify home page loads fully on Mozilla Firefox
Browser	Mozilla Firefox (Latest)
Preconditions	Browser is open, internet is connected
Test Steps	1. Open Firefox 2. Navigate to https://www.demoblaze.com
Expected Result	Page loads with consistent layout as in Chrome
Actual Result	Page loads correctly. Fonts and layout consistent
Status	PASS

TC-BC-003 — Home Page Loads on Microsoft Edge

Field	Details
Test Case ID	TC-BC-003
Description	Verify home page loads fully on Microsoft Edge
Browser	Microsoft Edge (Latest)
Preconditions	Browser is open, internet is connected
Test Steps	1. Open Edge 2. Navigate to https://www.demoblaze.com
Expected Result	Page loads with consistent layout
Actual Result	Page loads correctly. No visual discrepancies
Status	PASS

TC-BC-004 — Home Page Loads on Safari

Field	Details
Test Case ID	TC-BC-004
Description	Verify home page loads fully on Safari
Browser	Safari (Latest, macOS/iOS)
Preconditions	Safari browser is open, internet is connected
Test Steps	1. Open Safari 2. Navigate to https://www.demoblaze.com
Expected Result	Page loads with consistent layout
Actual Result	Minor: Carousel transition animation slightly jerky on Safari iOS. Layout otherwise intact
Status	MINOR ISSUE

TC-BC-005 — Navbar Links Work on All Browsers

Field	Details
Test Case ID	TC-BC-005
Description	Verify all navbar links are functional across browsers
Browser	Chrome, Firefox, Edge, Safari
Preconditions	Website is loaded
Test Steps	1. Click “Home” 2. Click “Cart” 3. Click “Log In” 4. Click “Sign Up”
Expected Result	Each link navigates correctly or opens the correct modal
Actual Result	All navbar links functional on Chrome, Firefox, Edge. On Safari Mobile, “Cart” tap requires double tap occasionally
Status	MINOR ISSUE (Safari Mobile)

TC-BC-006 — Product Category Filters Work on All Browsers

Field	Details
Test Case ID	TC-BC-006
Description	Verify “Phones”, “Laptops”, “Monitors” filters filter products correctly
Browser	Chrome, Firefox, Edge, Safari
Preconditions	Home page is loaded
Test Steps	1. Click “Phones” 2. Click “Laptops” 3. Click “Monitors”
Expected Result	Product grid updates to show only the selected category
Actual Result	Filters work on Chrome, Firefox, Edge. On Firefox, there is a ~1s delay before products filter
Status	MINOR ISSUE (Firefox delay)

TC-BC-007 — Sign Up Modal on All Browsers

Field	Details
Test Case ID	TC-BC-007
Description	Verify Sign Up modal opens, accepts input and closes properly
Browser	Chrome, Firefox, Edge, Safari
Preconditions	Home page is loaded

Field	Details
Test Steps	1. Click “Sign Up” in navbar 2. Enter username 3. Enter password 4. Click “Sign Up” button
Expected Result	Modal opens, fields accept input, alert shows success
Actual Result	Works on Chrome, Firefox, Edge BUG: On Safari, after closing modal, previously typed data persists when modal is reopened
Status	FAIL (Safari — data persistence bug)

TC-BC-008 — Login Modal on All Browsers

Field	Details
Test Case ID	TC-BC-008
Description	Verify Login modal opens and authenticates users
Browser	Chrome, Firefox, Edge, Safari
Preconditions	A registered account exists
Test Steps	1. Click “Log In” 2. Enter credentials 3. Click “Log In” button
Expected Result	Modal closes, navbar shows “Welcome [username]”
Actual Result	Works on all browsers. Username displayed in navbar after login
Status	PASS

TC-BC-009 — Add to Cart on All Browsers

Field	Details
Test Case ID	TC-BC-009
Description	Verify “Add to cart” button works across all browsers
Browser	Chrome, Firefox, Edge, Safari
Preconditions	User is logged in, on a product detail page
Test Steps	1. Open any product 2. Click “Add to cart”
Expected Result	Alert appears: “Product added”
Actual Result	Alert works on Chrome, Firefox, Edge On Safari iOS, the confirmation alert is sometimes blocked by the browser’s popup blocker
Status	MINOR ISSUE (Safari popup blocker)

TC-BC-010 — Cart Page Displays Correctly on All Browsers

Field	Details
Test Case ID	TC-BC-010
Description	Verify cart page shows correct items, prices, and total
Browser	Chrome, Firefox, Edge, Safari
Preconditions	Items have been added to cart
Test Steps	1. Click “Cart” in navbar 2. View cart items and total
Expected Result	All items listed with correct prices and total sum
Actual Result	Works on Chrome, Firefox, Edge BUG: Total price sometimes shows as blank on Firefox on first load (refreshing fixes it)
Status	MINOR ISSUE (Firefox)

TC-BC-011 — Place Order Modal on All Browsers

Field	Details
Test Case ID	TC-BC-011
Description	Verify “Place Order” form opens and submits correctly
Browser	Chrome, Firefox, Edge, Safari
Preconditions	Items in cart
Test Steps	1. Go to Cart 2. Click “Place Order” 3. Fill Name, Country, City, Credit Card, Month, Year 4. Click “Purchase”
Expected Result	Success modal shows order confirmation with details
Actual Result	Works correctly on all browsers. No validation error for blank required fields — all browsers accept empty form submission
Status	FAIL — BUG: No form validation on required fields (all browsers)

TC-BC-012 — Contact Modal on All Browsers

Field	Details
Test Case ID	TC-BC-012
Description	Verify Contact modal opens and sends message
Browser	Chrome, Firefox, Edge, Safari
Preconditions	Website is loaded

Field	Details
Test Steps	1. Click “Contact” in navbar 2. Fill in fields 3. Click “Send Message”
Expected Result	Alert confirms message was sent
Actual Result	Alert appears on all browsers. BUG: Empty form can be submitted with no validation error
Status	MINOR ISSUE (no field validation)

5. Device / Responsive Compatibility Test Cases

TC-RES-001 — Desktop Layout (1920×1080)

Field	Details
Test Case ID	TC-RES-001
Description	Verify website layout on full HD desktop resolution
Device	Desktop — 1920×1080 px
Preconditions	Website loaded in Chrome on desktop
Test Steps	1. Open site on desktop browser at 1920×1080
Expected Result	Navbar, carousel, product grid in 3–4 columns, footer all render cleanly
Actual Result	Layout is correct. Products display in 3-column grid. Navbar is fully visible
Status	PASS

TC-RES-002 — Laptop Layout (1366×768)

Field	Details
Test Case ID	TC-RES-002
Description	Verify website layout on common laptop resolution
Device	Laptop — 1366×768 px
Preconditions	Website loaded in Chrome
Test Steps	1. Resize browser to 1366×768 or use DevTools
Expected Result	No horizontal scroll, no overlapping elements
Actual Result	Layout scales correctly
Status	PASS

TC-RES-003 — Tablet Layout (768×1024)

Field	Details
Test Case ID	TC-RES-003
Description	Verify website layout on tablet (portrait)
Device	Tablet — 768×1024 px (iPad)
Preconditions	Website loaded in browser with DevTools tablet simulation
Test Steps	1. Open DevTools (F12) 2. Set device to iPad / 768 px width
Expected Result	Navbar collapses to hamburger menu or scales properly; products in 2-column grid
Actual Result	ISSUE: Navbar does NOT collapse to hamburger menu on tablet. Links appear squished horizontally
Status	FAIL — Layout issue on tablet

TC-RES-004 — Mobile Layout (375×812)

Field	Details
Test Case ID	TC-RES-004
Description	Verify website layout on mobile (iPhone 13 size)
Device	Mobile — 375×812 px
Preconditions	Website loaded with DevTools mobile simulation or real device
Test Steps	1. Open DevTools 2. Set device to iPhone 13 / 375 px
Expected Result	Single-column product grid, navbar collapses, text is readable
Actual Result	ISSUES FOUND: 1. Navbar items overflow and some links are hidden 2. Product images overlap card text on very small screens 3. Carousel arrows are too small and hard to tap
Status	FAIL — Multiple layout issues on mobile

TC-RES-005 — Carousel / Slider on Mobile

Field	Details
Test Case ID	TC-RES-005
Description	Verify hero carousel works via swipe on mobile

Field	Details
Device	Mobile — 375×812 px
Preconditions	Website loaded on mobile browser or DevTools
Test Steps	1. Load home page on mobile 2. Attempt to swipe carousel left/right
Expected Result	Carousel responds to swipe gestures on touch screens
Actual Result	BUG: Carousel does NOT support swipe gestures. Only works with arrow buttons which are too small to tap on mobile
Status	FAIL

TC-RES-006 — Product Images on Mobile

Field	Details
Test Case ID	TC-RES-006
Description	Verify product images scale properly on mobile
Device	Mobile — 375×812 px
Preconditions	Home page is loaded on mobile
Test Steps	1. Open home page on mobile screen 2. Scroll through product cards
Expected Result	Images scale to fit within their card containers
Actual Result	Images scale correctly inside product cards
Status	PASS

TC-RES-007 — Modals on Mobile (Sign Up / Login)

Field	Details
Test Case ID	TC-RES-007
Description	Verify modals are usable on mobile screen size
Device	Mobile — 375×812 px
Preconditions	Website loaded on mobile
Test Steps	1. Tap “Sign Up” 2. Check modal appearance and input usability
Expected Result	Modal fits screen, fields are tappable, Close button is visible
Actual Result	ISSUE: Modal Close (×) button is partially cut off on very small screens. Input fields are accessible but modal scrolling is absent

Field	Details
Status	MINOR ISSUE

TC-RES-008 — Cart Page on Mobile

Field	Details
Test Case ID	TC-RES-008
Description	Verify cart page renders and functions correctly on mobile
Device	Mobile — 375×812 px
Preconditions	Items in cart
Test Steps	1. Open cart page on mobile 2. Check item list, price, delete buttons
Expected Result	Table fits screen or scrolls horizontally; buttons are tappable
Actual Result	ISSUE: Cart table overflows screen horizontally. User must scroll right to see “Delete” button — not intuitive on mobile
Status	FAIL — Cart table not responsive on mobile

6. Layout Issues Found

Issue				
ID	Page	Browser/Device	Description	Severity
LI-001	Home	All Mobile (<480px)	Navbar links overflow; some items hidden or squished	High
LI-002	Home	Tablet (768px)	Navbar does not collapse — links appear horizontally squished	High
LI-003	Home	Mobile	Carousel arrows too small for touch interaction	Medium
LI-004	Cart	Mobile	Cart table overflows screen horizontally	High
LI-005	Modals	Mobile	Close (×) button partially cut off on screens < 380px wide	Medium
LI-006	Home	Safari iOS	Carousel animation is slightly jerky	Low

7. Broken Links Found

Link ID	Page	Link Text / Location	Expected Destination	Actual Result	Status
BL-001	Footer	“About Us” footer link	About page or section	Scrolls to carousel section — no dedicated page	Minor
BL-002	Navbar	Logo / Brand name	Home Page (/)	Works correctly	OK
BL-003	Home	“Next” pagination button	Next set of products	Loads next products correctly	OK
BL-004	Product	“Add to cart” (logged out)	Should prompt login	Shows alert “Product added” even when not logged in — cart does not persist	Minor

8. Functionality Discrepancies

Issue ID	Feature	Browser/Device	Expected Behavior	Actual Behavior	Severity
FD-001	Sign Up modal	Safari (All)	Closing modal clears form fields	Previously entered data persists when modal is reopened	Medium
FD-002	Place Order form	All Browsers	Required fields validated before submission	No field validation — empty form submits and confirms purchase	High
FD-003	Contact form	All Browsers	Required fields validated before submission	Empty form can be submitted without any validation error	Medium
FD-004	Cart total price	Firefox	Total price displayed on page load	Price shows as blank on first load; requires page refresh	Medium
FD-005	Carousel	Mobile (All)	Supports swipe gesture on touch devices	Carousel does not respond to swipe; only arrow buttons work	High
FD-006	“Add to cart”	All (Logged Out)	Prompt user to log in before adding to cart	Product appears added with alert but is not saved to cart	Medium

Issue					
ID	Feature	Browser/Device	Expected Behavior	Actual Behavior	Severity
FD-007	Navbar “Cart” tap	Safari Mobile	Single tap navigates to cart	Requires double tap on some Safari Mobile versions	Low

9. Bug Summary Table

Bug ID	Description	Severity	Affected Browser/Device	Status
BUG-001	No form validation on “Place Order” modal	High	All browsers	Open
BUG-002	Navbar overflow / hidden links on mobile	High	Mobile (All browsers)	Open
BUG-003	Cart table horizontal overflow on mobile	High	Mobile (All browsers)	Open
BUG-004	Carousel no swipe support on touch devices	High	Mobile (All browsers)	Open
BUG-005	Sign Up modal data persists after closing (Safari)	Med	Safari	Open
BUG-006	Cart total price blank on first load	Med	Firefox	Open
BUG-007	No validation on Contact form	Med	All browsers	Open
BUG-008	Add to Cart works without login but cart doesn’t save	Med	All browsers	Open
BUG-009	Navbar does not collapse on tablet (768px)	Med	Tablet (All browsers)	Open
BUG-010	Modal close (×) button cut off on small screens	Low	Mobile < 380px	Open
BUG-011	Carousel animation jerky on Safari iOS	Low	Safari iOS	Open
BUG-012	Cart “Delete” button not visible on mobile (off-screen)	Med	Mobile (All browsers)	Open

10. Recommended Fixes

Fix 1 — Responsive Navbar (Priority: HIGH)

Issue: Navbar links overflow and collapse incorrectly on tablet and mobile.

Recommendation:

```
/* Add Bootstrap navbar-toggler or custom hamburger menu */
@media (max-width: 768px) {
  .navbar-nav {
    display: none;
  }
  .navbar-toggler {
    display: block;
  }
}
```

Alternatively, ensure Bootstrap's `navbar-collapse` class is properly implemented with a hamburger toggle button for screens `<768px`.

Fix 2 — Responsive Cart Table (Priority: HIGH)

Issue: Cart table overflows horizontally on mobile.

Recommendation:

```
/* Wrap table in scrollable container */
.cart-table-wrapper {
  overflow-x: auto;
  -webkit-overflow-scrolling: touch;
}
```

Or redesign cart as a stacked card layout on mobile instead of a table.

Fix 3 — Carousel Touch/Swipe Support (Priority: HIGH)

Issue: Carousel does not respond to swipe on touch devices.

Recommendation: Enable Bootstrap's built-in touch support:

```
<div id="carouselExample" class="carousel slide" data-bs-touch="true">
```

Or add a touch library like `Hammer.js` for swipe gesture support.

Fix 4 — Form Validation on Place Order & Contact (Priority: HIGH)

Issue: Forms submit without validating required fields.

Recommendation:

```
// Add validation before form submission
function validateOrder() {
  const name = document.getElementById('name').value.trim();
  const card = document.getElementById('card').value.trim();
  if (!name || !card) {
    alert('Please fill in all required fields.');
```

return false;
 }
 return true;
}

Use HTML5 required attribute as a minimum, and add custom JS validation for better UX.

Fix 5 — Clear Modal Fields on Close (Priority: MEDIUM)

Issue: Sign Up modal retains data after closing, especially on Safari.

Recommendation:

```
$('#signInModal').on('hidden.bs.modal', function () {
  document.getElementById('sign-username').value = '';
  document.getElementById('sign-password').value = '';
});
```

Fix 6 — Cart Total on Firefox (Priority: MEDIUM)

Issue: Cart total price is blank on first load in Firefox.

Recommendation: Ensure total is calculated after DOM is fully rendered, not before:

```
document.addEventListener('DOMContentLoaded', function() {
  calculateTotal(); // ensure this fires only after DOM ready
});
```

Fix 7 — Login Guard for Add to Cart (Priority: MEDIUM)

Issue: Guest users can click “Add to cart” but item is not saved.

Recommendation: Check authentication before allowing cart action:

```
if (!loggedUser) {
  alert('Please log in to add items to your cart.');
```

Fix 8 — Carousel Animation on Safari iOS (Priority: LOW)

Issue: Carousel transitions are slightly jerky on Safari iOS.

Recommendation:

```
.carousel-item {  
  -webkit-transform: translate3d(0, 0, 0);  
  transform: translate3d(0, 0, 0);  
  will-change: transform;  
}
```

11. Overall Compatibility Matrix

Browser Compatibility Summary

Feature / Page	Chrome	Firefox	Edge	Safari
Home Page Load	Pass	Pass	Pass	Pass
Navbar Links	Pass	Pass	Pass	Minor
Category Filters	Pass	Delay	Pass	Pass
Carousel	Pass	Pass	Pass	Jerky
Sign Up Modal	Pass	Pass	Pass	Bug
